

Supplemental Material

A Additional Mean Performance Plots

B Reversal between Mean Reputation and Relative Reputation

In this section we present the results in isolation and in competition over the "Heavy Tail" prior discussed in the text for $K = 3$. We demonstrate evidence that $DEG > DG$ according to the mean reputation metric but that $DG > DEG$ according to the relative reputation proportion statistic and in the competition game.

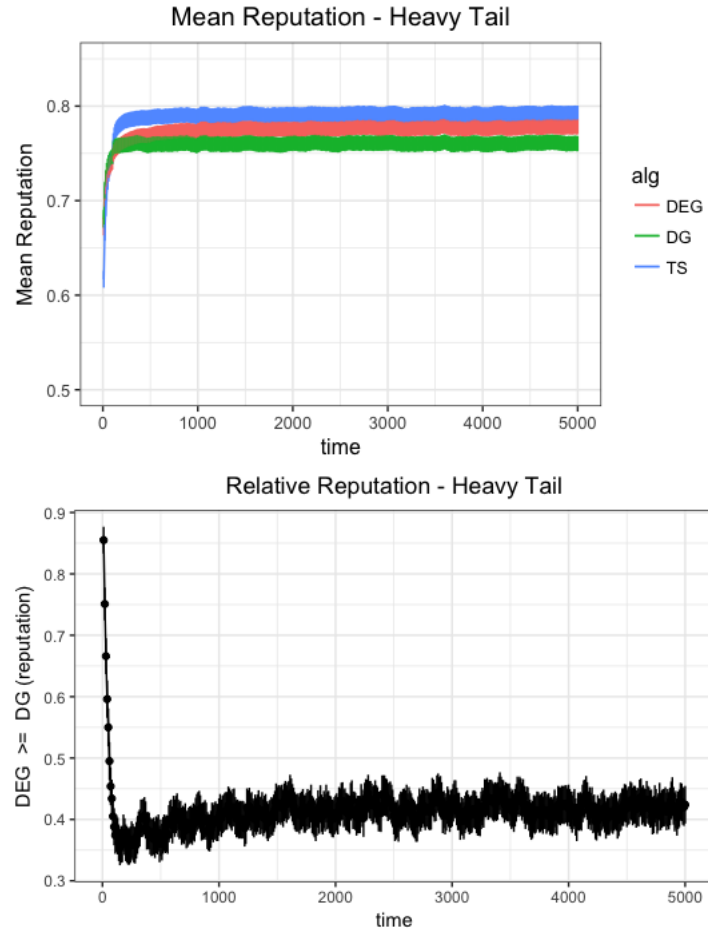

Table 1: Duopoly Experiment Heavy Tail K=3, t=5000

	k = 20	k = 250	k = 500
	0.4 ± 0.02	0.59 ± 0.01	0.6 ± 0.01
TS vs DG	eeog	eeog	eeog
	avg: 770	avg: 2700	avg: 2700
